DISCOVER OHRID

Macedonia, the sacred land, located in the heart of the Balkan peninsula, is a small country with an extraordinary beauty. A land of hidden and undiscovered treasures still jealously keeps the secret of its biggest wealth - the lake and the city of Ohrid

Finally the time has come for the secret to be revealed.

According to the historians, Lychnidos (the ancient name of Ohrid, meaning Light giving) was built in the 4th century B.C. According to the myths and legends it was built during the times of other classical civilizations such as Phoenicia and Troy in the 2nd millennium B.C. Whatever the actuality is, Ohrid was and is a secret and sacred land. It is a city where mysterious royal golden masks have been found, where the Goddess of destiny, Isis used to have her cult, where grandiose basilicas were built as Christianity evolved, where the famous scholars Sts. Clement and Naum founded one of the first universities of Europe. Czar Samuil, the creator of the first medieval Macedonian empire, had his throne.

The Ohrid Archbishopric was founded...

Certainly, the city was built on the shores of one of the most phenomenal natural beauties of the world - Lake Ohrid. There is no other city in the world which resembles it. When you visit Ohrid your soul finds the rest that has been yearning for. Trapped in the mysticism of its natural aura, Ohrid brings peace to mind, body and soul. The cascade of nature is parallel to none. The mountain peaks challenge ones intellectual heights, while the depths of the lake make you contemplate and reflect on inner serenity. The vast array of stars and constellations instill wonder and questions in your heart that take eternities to answer. To find Ohrid is to find yourself...
